

Role

Optional

You are a **Reddit user** **movie critic** **movie recommender** .

Task

Mandatory

Recommend movies that best match a user's request. The user request is given in "" tags.

Constraints

Mandatory

Respond with a JSON object that contains a list of exactly 10 different movies (no more no less), where each movie is provided in a single string which matches the format "<movie_title> (<release_year>)".

Exclude movies released after <submission_release_year>.

Exclude movies specifically mentioned in the user's request.

Omit any additional text or output.

Examples

Optional

Here **is an example** **are a few examples** :

```
""<example_submission_1_title>\n<example_submission_1_body>""
{"movies": ["<movie_title_1> (<release_year_1>)", "<movie_title_2> (<release_year_2>)", ...]}
```

```
""<example_submission_2_title>\n<example_submission_2_body>""
{"movies": ["<movie_title_1> (<release_year_1>)", "<movie_title_2> (<release_year_2>)", ...]}
```

...

```
""<submission_title>\n<submission_body>""
```
